

ELEGANT ROUND KNOBS WITH INTEGRATED BACKPLATE

Two patterns, each in 2 sizes, available in 7 finishes. Simply stunning! Our classic round brass knob, the K-12, is and has been a best seller for years. But, as some of you noted, the proportions can be a bit, ahem, traditional. Some cabinets require something with a little more heft. Our newest knobs come in both a smooth and beehive style, providing the heft and styling appreciated by the finest cabinetmakers in the world. Use one size or both, either way these knobs make a statement. Precision machined in England and hand finished in our Connecticut factory, these knobs expand upon the Horton Brasses tradition of quality craftsmanship.

K-5 SMOOTH ROUND KNOB and K-6 BEEHIVE ROUND KNOB

(brass) 1 1/4" diameter	\$16.75	(brass) 1 1/2" diameter	\$21.00
(nickel) 1 1/4" diameter	\$20.00	(nickel) 1 1/2" diameter	\$30.00

QUESLETT PULLS

Our new *Queslett Bin Pulls* take their name from the Queslett region of Birmingham, designed with input from the finest English cabinetmakers. These sand cast pulls are classically elegant with a luxurious texture and substantial heft. Machine screw mounted (the mounting screws are hidden), the *Queslett Bin Pulls* will look beautiful on your kitchen cabinets. Mix with other knobs and pulls from the Horton Brasses hardware collection or use the Queslett in a variety of sizes. We think the largest works both horizontally and vertically and lends itself particularly well to dishwashers. The smallest is an absolutely darling fit for spice drawers and narrow pull-outs. Quintessentially British, crafted of the highest quality materials by skilled artisans, our *Queslett Bin Pulls* are suited to complement the most extraordinary kitchens.

Q-96 PULL		Q-40 PULL		Q-203 PULL	
(brass)	\$23.00	(brass)	\$18.75	(brass)	\$52.50
(nickel)	\$26.75	(nickel)	\$21.00	(nickel)	\$57.25
Overall size: 4 1/4" x 1 5/8"		Overall size: 2 9/16" x 1 5/8"		Overall size: 9" x 1 5/8"	

BAKES PULLS

Designed by an English cabinetmaker working in America, the Bakes Pulls satisfy the need for a high quality suited set of pulls. Sand cast for a smooth and elegant design, these pulls are available in 4 different sizes for use throughout your entire kitchen. Mount horizontally or vertically on cabinet doors. With a range of sizes, Bakes Pulls are the perfect choice for singular pulls on kitchen drawers. Larger sized pulls are appropriate for pantry doors as well as further customizing dishwashers and paneled refrigerators. I could even picture them on a swinging door or as an embellishment on single hung windows. Because Bakes Pulls are available in all 7 of Horton Brasses' finishes, you can easily mix and match them with any of our hardware. The understated elegance of this design makes it the perfect pull for a breadth of kitchen styles.

BB-1 PULL		BB-3 PULL	
(brass) 15"	\$195.50	(brass) 7"	\$44.00
(nickel) 15"	\$220.00	(nickel) 7"	\$51.25
BB-2 PULL		BB-4 PULL	
(brass) 10"	\$48.25	(brass) 6"	\$40.00
(nickel) 10"	\$54.75	(nickel) 6"	\$45.00

CRESCENT BIN PULLS

Another sand casting made for us in England, our new Crescent Bin Pulls are hand finished in all 5 of our brass finishes plus satin and polished nickel. The styling of these pulls differ from our more traditional Classic Bin Pulls. Like the Queslett Bin Pulls, our Crescent Bin Pulls are mounted with machine screws so there is no visible mounting hardware. This clean look is attractive in a variety of settings, from early New England homes to the popular mid-century modern look. Luxurious to the touch, the Crescent Bin Pull makes opening a cabinet a sublime tactile experience. You can feel the soft texture on the inside of each pull and the little bump towards the front, giving you a perfectly sized spot to grip. Discerning homeowners with a penchant for detail will appreciate the exquisite materials and superior design of this versatile hardware.

BN-4 BIN PULL	
(brass)	\$16.75
(nickel)	\$23.50
Overall size: 3 5/8" x 1 11/16"	

HORTON BRASSES' FINISHES

You'll find Horton finishing to be exceptional. Our brass finishes are dipped in coloring solution and hand rubbed with mineral oil to create a deep luster. We never use spray finishes, as they don't provide the depth and life of a dipped finish. All of our finishes are sent without lacquer. The 5 brass finishes will age and tarnish naturally. All are available with a custom lacquered finish on request. Satin and polished nickel finishes darken slightly in time but do not truly tarnish.

LIGHT ANTIQUE FINISH (LA)

Our newest finish. Light Antique is lighter than our regular Antique but not so bright as to look new. The beautiful gold color shines through the soft antique brown.

ANTIQUÉ FINISH (A)

Antique is our most popular finish. The color of antique brass can vary, and we hope our photography shows the variety of hues well. Antique is a soft, brown finish, with the patina of antique brass. It can be lightened with brass polish, or buffed off completely. It is not lacquered and is an extremely versatile finish.

DARK ANTIQUE FINISH (DA)

Often called "oil rubbed bronze," this is a dark, nearly black finish. Daily usage and time will change an unlacquered finish, and handling will deepen and add a depth to the hue. A piece of Dark Antique hardware that is used frequently will lighten rather dramatically. Many of our customers have the dark antique lacquered.

SEMI-BRIGHT FINISH (SB)

Semi-bright brass has a smooth, satin look—golden but with a subdued sheen. The final step in achieving our semi-bright finish is to burnish the brass with steel brushes as fine as human hair. Semi-bright is not lacquered, and will age nicely.

BRIGHT FINISH (B)

Sometimes called "polished brass," our Bright finish is hand-polished to a mirror-like, brilliant shine. Each piece is individually buffed immediately prior to shipment. With the exception of a few items, the Bright finish is not lacquered, and will tone down with the passage of time.

POLISHED NICKEL FINISH (PN)

Brilliantly shiny, with a silvery, mirror-like surface, Polished Nickel is very compatible with stainless steel or chrome fixtures. All Polished Nickel hardware is made from solid brass. Brass hardware is polished and then nickel is applied over the brass to achieve its characteristic high shine.

SATIN NICKEL FINISH (SN)

A silvery finish with a soft, satin sheen. Kitchens with stainless steel appliances need complimentary hardware and Satin Nickel is the perfect choice. Solid brass hardware is brushed to a soft sheen and then nickel is applied in layers as a top coat. The soft silver luster is gorgeous and pleasing to the eye.
